System Engineer New Development

TechROi AB was founded in 1991. The company is comprised of four business areas integrated to provide engineering services across multiple sectors; such as automotive, aerospace, and other manufacturing industries.

Our staff have industry knowledge and experience, enabling us to understand and deliver exactly what is required by our customers. We challenge ourselves daily to be at the forefront of development and innovation and drive this forward with the service we provide.

Our customers rely on our ability to deliver high quality services, which enables us to constantly evolve and improve our capabilities.

We are active in various developmentintensive industries, producing the technology of the future. This gives us unique industry expertise that our customers depend on and our Consultants benefit from.
